

Features

- * With high energy density, miniaturization, ultra-thin, lightweight, and high security.
- * No battery leakage problems, and non-liquid electrolyte inside the battery, using colloidal solid.
- * Twice the capacity of lithium-ion batteries of the same size.
- * Adopt slot installation, aesthetics and convenient.
- * Lithium-Ion battery life is generally 300 to 500 charge cycles.

Specifications

| Model | TH-0521 |
|-------------------------|-------------|
| Rated Voltage | DC12V |
| Discharge Current | < 500mA |
| Charge Current | < 700mA |
| Working Hours Of Speech | > 8 hours |
| Standby Time | > 25 hours |
| Charge Voltage | DC15V |
| Dimension | 130x75x20mm |
| Weight | 0.25Kg |
